

ENGAGE COVID-19

Safety Response Plan

Engage Dance Academy remains committed to providing you with the safest dance environment possible through these unknown times of Covid-19. We would like to assure you we are taking sanitizing and social distancing very seriously!

How are we doing this:

- 1) Upon arrival, all dancers will:
 - a. have their temperature taken by a touch free thermometer
 - b. symptoms check:
 - i. Do you have a cough?
 - ii. Are you experiencing flu like symptoms?
 - iii. Have you been exposed to Coronavirus?
 - c. have their hands sanitized upon arrival and when leaving
- 2) We are properly sanitizing our studios in between each class, preparing it for the next group of dancers.
- 3) We have implemented staggered class start and end times to limit the dancer traffic in the hallways and dressing room to follow Government guidelines for group gatherings.
- 4) All of our in studio class sizes will have a maximum capacity limit to keep with social distancing guidelines.
- 5) All dancers and personnel on Engage Dance Academy property will be required to wear an Engage mask, available for purchase at the studio.
- 6) Dancers are asked to bring water bottles from home as our water fountain will only be usable to fill bottles, not for drinking. Touchless refills are available at our fountain.
- 7) Dancers are asked to come already changed for classes, reducing their time in the dressing room, and also asked to bring as little as possible with them in their dance bags.
- 8) No parents will be allowed to wait in our reception area or hallways. Our receptionists will have all dancer's parent's cell phone numbers on hand for an immediate phone call if necessary.
- 9) Each of our studios will be marked out to ensure the social distancing of all our dancers as required by the Government.
- 10) We strongly recommend having sanitizer in your bags. Small individual bottles of hand sanitizer are available at Engage Dance Academy's front desk for \$4 each.
- 11) We ask that families who have traveled outside of the country or have participated in large events in another state please consider a voluntary quarantine of five days for their student after returning home.
- 12) If having COVID symptoms, dancers may return to the studio once they are symptom-free, free of fever for 24 hours without medication, or have received a negative test for COVID-19.

We shall continue to update these guidelines as necessitated by the government.
